RE.MA.C. – Reinventing Mainstream Classrooms

[PROJECT NUMBER: 2022-1-CY01-KA220-HED-000088107]

RE.MA.C. Final Conference in Cyprus

The final conference in Cyprus took place on 28th November, at Frederick University in Limassol. Stakeholders, policy-makers, academics and practitioners gathered together for an afternoon and celebrated the closure of the project with welcoming speeches, roundtables, poster sessions and a networking farewell. This event gave the opportunity to all individuals and organisations who supported RE.MA.C. project to get together once more and pave the way for its sustainability.

RE.MA.C. Transnational Partners Meeting in Cyprus

The final partners' meeting in Cyprus took place along the final conference, between 27th – 29th November. Partners gathered together for the last time to discuss the project's updates in national contexts and the details of the project's closure. In taking time to reflect, partners highlighted the effective communication, support and understanding amongst them, the rich opportunities that the resources developed, implemented and tested offer and the impact that the project has in the contexts it run and beyond.

In this Issue

Welcome to RE.MA.C.'s fourth and last newsletter. In this issue, the last phase of the project, with the final meeting and conference in Cyprus is disseminated.

Project Updates

With the completion of the schools' implementations most partner-countries, RE.MA.C. partners have started disseminating the two e-booklets, the [e-booklet for teachers](#) and the [e-booklet for students](#). They have also established the RE.MA.C.'s [forum](#) where teachers from all over the worlds are invited to interact.
